

SIMATIC Burner Management Systems & BMS Consultants

SIMATIC Burner Management Systems offer all you need to monitor, control, diagnose, and maintain the various aspects of your fuel burning equipment. With TUV-certified automation hardware and customizable software, the compact BMS300F and BMS151F systems comply with the required NFPA, IEC, and ANSI/ISA standards for single or multiple burner/dual-fuel applications. Furthermore, these designs are capable of meeting up to SIL-3 with the appropriate field devices.

Benefits of SIMATIC Burner Management

Increased Safety and System Availability - Intuitive Safety Software, Seamless Integration into Existing Application

Improved Operations and Maintenance - HMI Display of Safety data, Intelligent Diagnostics, Remote Access Capabilities

Reduced Risk and Complexity - Compliance to Industry Standards, Flexible Design Configurations

BMS Solutions:

[1] BMS-À La Carte

- Purchase BMS components separately
- Integrate the BMS through your in-house engineering group
- Customized engineering available through recommended BMS Consultants

[2] Pre-packaged Solution

- Built to fit the needs of your application
- Includes panel, relevant hardware, and pre-engineered start-up software
- Available through recommended BMS Consultants
