

June 2016 Issue Volume 15, Issue 2

Siemens Process Instrumentation & Analytics News

June 2016

Welcome to Process Instrumentation & Analytics News. This quarterly newsletter provides information on the latest product updates, news releases and documentation for Siemens Process Instrumentation and Analytics.

Siemens "Measuring Success"

- ✓ Automation Summit - June 27-30 2016
- ✓ Oil and Gas Innovations Conference 2016
- ✓ Do you know the true cost of air in your plant?
- ✓ Check out the latest Process Instrumentation videos
- ✓ Meet Jonas Norinder - Chemical Business Development Manager
- ✓ Check out recent blogs
- ✓ Measuring Success Mobile Showcase
- ✓ Custom-Engineered Solutions

Product News

- ✓ SITRANS FC430 improves control in vaccine production
- ✓ Siemens expands pressure transmitter portfolio
- ✓ SITRANS P DS III used for transporting cryogenic liquid gases
- ✓ Radar level monitoring for chemical blending process
- ✓ Find Siemens on Facebook and Twitter

User Manuals, Application Guides, and Literature

- ✓ New brochures and catalogs
- ✓ Revised and new manuals and application guides

Events

- ✓ Trade shows
- ✓ Upcoming Process Instrumentation Training Classes
- ✓ Upcoming Process Analytics Training Classes

Siemens "Measuring Success"

Automation Summit - June 27-30 2016

The Automation Summit includes hands-on training, user-led presentations and demonstrations of the latest technology with experts in the Tech Café. Don't miss this opportunity to learn the latest strategies to advance operations at your facility.

There will be 50+ user led presentations at the event where you can hear from your peers first-hand how they were able to make significant improvements in their facility.

Oil and Gas Innovations Conference 2016

Siemens invited our customers to join executives, technology leaders, and industry experts for an in-depth look at how new innovative technologies and applications are solving key challenges facing the oil and gas industry today. Nearly 1,000 flooded the two day event in Houston.

Do you know the true cost of air in your plant?

Cost of air can become a significant factor to your company's bottom line. Come and learn how a wide range of unknown errors can generate unnecessary expense. Learn how to select and use air consuming instrumentation that can improve your carbon footprint and save you money. If you are in Plant Engineering, Operations, or I/E support this seminar will help you now and tomorrow.

Meet Jonas Norinder - Chemical Business Development Manager

Jonas Norinder is currently working as a Business Development Manager for the chemical industry. Since joining Siemens in 2006, he has held several roles within communications, marketing, and business development and sales. He brings with him a wealth of international business experience and instrumentation knowledge, particularly within flow.

- > [What are the challenges of measuring level in cement?](#)

Measuring Success Mobile Showcase

The Measuring Success Tour will be heading to Tennessee, Arkansas, Michigan, Ohio, Kentucky, New York and New England in June and July.

- > [Follow the Measuring Success Tour](#)

Custom-Engineered Solutions

Leverage Siemens' know-how to meet your process control challenges

Let Siemens design a fully integrated solution to address your process control challenges.

Product News

SITRANS FC430 improves control in vaccine production

Epitopix required a high-precision inline flow solution to monitor recirculation rate of oil and any resulting changes in density to optimize vaccine production. The SITRANS FC430 Coriolis flow meter was selected for compactness, accuracy, flexibility, ease of installation and outstanding customer service.

Siemens expands pressure transmitter portfolio

Siemens Process Industries & Drives Division announced today that it is expanding the SITRANS pressure transmitter portfolio with the newly developed SITRANS P310 for basic measurement and the advanced SITRANS P410.

SITRANS P DS III used for transporting cryogenic liquid gases

In the near future, the SITRANS P DS III series will be used in the TGE Marine Gas Engineering ships for remote monitoring of the cargo system, which is currently being built in China. These ships are used for the transport of cryogenic liquid gases LNG (-163°C) and LEG (-103.8°C) throughout the world.

Radar level monitoring for chemical blending process

A specialty chemical company used the SITRANS LR250 Flanged encapsulated antenna (FEA) radar level transmitter to solve a problem monitoring blending processes.

Events

Trade shows

- > Aug 16-19, 2016: Williston Basin Petroleum Conference, Bismarck, ND
- > Sept 19-22, 2016: American School of Gas Measurement, Houston, TX
- > Sept 24-28, 2016: WEFTEC, New Orleans, LA
- > Oct 4-5, 2016: Furnaces North America (FNA), Nashville, TN
- > Oct -5-7, 2016: A&WMA Pacific Northwest International Section, Juneau, AK
- > Oct 11-12, 2016: Gulf Coast Conference, Houston, TX

Upcoming Process Instrumentation Training Classes

Process Instrumentation Courses - Log-on to > <http://www.sitrain.us/SII> to view course descriptions

- > Field Instrumentation (PIA-PRT5C1A)
- > Flow Technologies (PIA-PRT3C1A)
- > Level Technology (PIA-PRT1C1A)
- > SITRANS FUG1010 Clamp-on Product (PIA-PRFUGC1A)
- > SITRANS FUH1010 (PIA-PRFUHC1A)
- > SITRANS FUS/FUE 1010 Clamp-On Products (PIA-PRFUEC1A)
- > Water and Wastewater
