Environmental: Water
Every drop of water and every unit of energy counts
Environment: Water | Process Instrumentation

Instrumentation that puts you in control

Water is at the heart of life and economic activity. Measurement of critical process parameters is key for process management and sustainability throughout all phases of the plant life cycle.

Siemens instrumentation offers you the technology to put you in control. We not only give you accuracy and reliability of measurement but also the reassurance of seamless integration from the planning and engineering phase to operation and modernization. Siemens Totally Integrated Automation (TIA) ensures that the data and alerts from your instrumentation and process analytics devices are translated into early and effective action.

Faster and more efficient processes and operations in the water industry
To save time and money, processes need to be simplified and run efficiently. Integrated engineering with COMOS and SIMATIC PCS 7, the Consultant DVD and the Industry Library from Siemens offer outstanding solutions.

A complete portfolio
We offer a complete portfolio of field instruments for flow, level, pressure and temperature measurement. Our technology is designed to fit your individual needs. We feel responsible for sustainable resource management and for efficient use of energy.

Besides inline flow measurement, clamp-on technology, ideal for retrofit installations, extends the standard offering. Custody transfer-approved instruments guarantee accurate billing of water or heating/cooling energy. Battery-operated meters and wireless technology enable you to control stand-alone devices in remote or inaccessible locations, giving you reliable information from the field as well as reduced cabling or other infrastructure costs.

Siemens Process Instrumentation is part of the Siemens Environmental Portfolio
This covers all Siemens products that are of extraordinary benefit for the environment and for our customers. Siemens flowmeters for water applications and valve positioners for compressed air applications are certified products.

With Siemens you have the reassurance of best-in-class products and a partner who understands your industry. Discover more in this brochure and at: www.usa.siemens.com/pi
PIA Life Cycle Portal

The PIA Life Cycle Portal is a web-based application for easy and convenient product selection and configuration.

How to get access
You can access the PIA Life Cycle Portal around-the-clock at usa.siemens.com/pia-portal. It offers you active support to find the best solution from the extensive Siemens portfolio of sensors and process analytical products. The portal can be used to see how different solutions can be put to use in process and factory automation.

You can choose between several selection access options to find the appropriate product solution for your specific requirements:

• Direct access sends you straight to a specific configuration if you know the product you are seeking.
• “Guided selection” lets you to select the appropriate application, technology or industry and specify the measurement task based on the various relevant parameters for your particular application.

Advantages at a glance:
• Convenient product selection support with answers to typical questions
• A variety of selection possibilities: see the sample processes and simply select from the recommended process instrumentation and analytics products
• Project lists for an order enquiry can be quickly created
• Different possibilities for processing data and information
• No separate installation needed
• Product selection for spare parts
• The latest product data and information for Siemens process instrumentation and analytics

**Level measurement**

### Ultrasonic

<table>
<thead>
<tr>
<th>SITRANS LUT400</th>
<th>Echomax Transducers</th>
<th>SITRANS LH100</th>
<th>SITRANS LVL100/200</th>
</tr>
</thead>
</table>

**Brief description**

- Compact, single-point, long-range ultrasonic controllers for continuous level, or volume measurement of liquids, slurries, and solids, and high-accuracy monitoring of open channel flow. ±1 mm high accuracy in standard operation. Measuring range up to 60 m.

- Range of ultrasonic transducers provides reliable continuous level measurement. Various models for a wide range of applications.

- 2-wire submersible pressure transmitter to measure hydrostatic pressure, compact version.

**Features and benefits**

- Separated transceiver/transducer (Echomax) protects the electronics from extreme vibration.
- High-frequency, non-contacting ultrasonic transducer is free of electronic components and fully potted to provide long-term reliability.
- Energy-saving algorithms for minimizing pump operation during high-cost energy periods.
- Sonic Intelligence is standard and is proven to provide superior performance in difficult conditions.
- Communication: HART®
- Approvals: MCERTs, CSA, FM, UL, C-Tick

- Narrow beam angle from 6 to 12°
- Chemically resistant PVDF copolymer enclosure and CMS rubber face
- Fully submersible
- Integral temperature compensation
- Max. cable length of 365 m (1200 ft)
- Choice of mounting brackets available for ease of installation
- Approvals: ATEX, FM, CSA

- IP68 stainless steel housing (23.4 mm diameter) with a piezoresistive sensor and ceramic diaphragm.
- Converts the level-proportional hydrostatic pressure into a standardized signal 4 – 20mA
- Accuracy 0.3%
- Measuring range: Standard 4, 5, 6, 10 and 20 m (60ft H2O), on request from 4 to 30 m (98 ft H2O)
- Communication: 4 – 20 mA
- Approvals: ATEX, IECEx

- Compact insertion length of 40 mm for tight spaces
- Test function standard to confirm correct operation
- Fault monitoring for corrosion, loss of vibration, or line break to the piezo drive Independent of dielectric and other material conditions such as vapors, gases, bubbles, foam
- Robust design with threaded piezo drive system to prevent failure in aggressive applications
- Approvals: EHEDG, 3A, FDA, WHG, ATEX, FM, CSA, SIL2, IECEx

**Typical applications**

- Open-channel flow monitoring in sewers, combined sewer overflow. Wet well level and pump control, storm water tank and level monitoring in holding tanks/vessels in water and wastewater treatment plants.
- Installation in tanks, vessels, hoppers, open space like in dam or in open channel along with ultrasonics controllers like SITRANS LUT, HydroRanger 200 to form complete ultrasonics level or flow measurement system.
- Level monitoring under harsh environmental conditions and for installation in tight spaces, e.g. in deep narrow wells, very foamy sumps & wet wells, grease traps, irrigation canals, dams and reservoirs in water and wastewater treatment processes.
- High and low point level detection for liquid or slurries in various chemical and process water storage tanks and sumps in water and wastewater treatment plants.

## Electromagnetics

**Typical brief description**

- Water leak detection and monitoring applications. Without the need for cut out or stop flow. Non-intrusive metering. Easy installation and maintenance.

**SITRANS F M MAG 5100 W**

- Approvals: according to regional and national standards
- Built-in length according to ISO 13359
- Increased low flow accuracy for water leak detection
- Integrated Hastelloy C grounding and measuring design
- Can be upgraded to IP68 on site to be buried downstream from the sensor

**SITRANS F M MAG 5000 / 6000 / 6000 I**

- Approvals: according to regional and national standards
- Easy commissioning, SENSORPROM unit
- Built-in length according to ISO 13359
- Increased low flow accuracy for water leak detection
- Integrated Hastelloy C grounding and measuring design
- Can be upgraded to IP68 on site to be buried downstream from the sensor

**SITRANS F M Verificator**

- No expensive removal or installation costs
- Fully automated – no manual set up or data input – verification of the sensor, the transmitter and the flow meter installation
- Verification of the sensor, the transmitter and the flow meter installation
- In-situ check of performance without interrupting the flow
- No process shutdown for installation
- No pressure drop or energy loss
- Wide turndown ratio
- Choice of single channel or dual path.
- Zeromatic Path automatically sets zero without stop ping flow and reduces zero drift, even at low flow
- 4GB SD card for storage and data logging
- 4GB SD card for storage and data logging
- Combination Approval: ATEX, IECEx, FM, FM Canada
- Communication: HART, PROFIBUS PA / DP, DeviceNet, FF
- Communication: HART 7.5, Modbus RTU RS 485
- 4GB SD card for storage and data logging
- Zeromatic Path automatically sets zero without stop ping flow and reduces zero drift, even at low flow
- 4GB SD card for storage and data logging

**SITRANS F M MAG 8000 / CT**

- Approvals: CT, NSF/ANSI Standard 61, MI 001 (cold water)
- 4GB SD card for storage and data logging
- Zeromatic Path automatically sets zero without stop ping flow and reduces zero drift, even at low flow
- 4GB SD card for storage and data logging
- Combination Approval: ATEX, IECEx, FM, FM Canada
- Communication: HART, PROFIBUS PA / DP, DeviceNet, FF
- Communication: HART 7.5, Modbus RTU RS 485
- 4GB SD card for storage and data logging

**SITRANS FS230**

- No process shutdown for installation
- No pressure drop or energy loss
- Wide turndown ratio
- Choice of single channel or dual path.
- Zeromatic Path automatically sets zero without stop ping flow and reduces zero drift, even at low flow
- 4GB SD card for storage and data logging

**SITRANS FS220**

- No process shutdown for installation
- No pressure drop or energy loss
- Wide turndown ratio
- Choice of single channel or dual path.
- Zeromatic Path automatically sets zero without stop ping flow and reduces zero drift, even at low flow
- 4GB SD card for storage and data logging

**SITRANS FCS300**

- The flow measuring principle is based on the Coriolis Effect. The Coriolis Effect will act on the vibrating tubes and cause deflection which can be measured as a phase shift between pick-ups 1 and 2. The phase shift is proportional to the mass flow rate.

**Coriolis features and benefits**

- Advanced transmitter functionality
- Up to 4 I/Os
- HART, Profinet DP/IPA and Modbus
- Fully graphical display
- Tube Sizes: 1/16th inch to 6 inches
- Advanced diagnostic functionalities
- Advanced aerated flow filtering
- Customization of views
- Trend curves
- USB service interface
- Internal data logger
- Integrated fraction tables (e.g. Brix, % Alcohol, Plato)

**Ultrasonic features and benefits**

- No process shutdown for installation
- Minimal maintenance: external sensors do not require periodic cleaning
- 100 Hz update rate for all output on all primary process values
- No moving parts to wear or foul
- No pressure drop or energy loss
- Compact, integral design reduces installation cost
- Wide-Beam technology ensures high performance
- Zeromatic Path eliminates zero drift

**Typical applications**

- Coriolis flowmeters are suitable for applications within the entire process industry where there is a demand for accurate flow measurement. The meter is capable of measuring both liquid and gas flow and can be applied in Water & Waste Water for dosing of chemicals for water treatment.

- Water leak detection and monitoring applications. Without the need for cut out or stop flow. Non-intrusive metering. Easy installation and maintenance.

- Water leak detection and monitoring applications. Without the need for cut out or stop flow. Non-intrusive metering. Easy installation and maintenance.

**Brief description**
- Vortex flowmeters provide accurate volumetric and mass flow measurement of steam, gases and liquids, with integrated temperature and pressure compensation.
- Compact single-range transmitters for absolute and gauge pressure. Measurement of process pressure, absolute pressure and hydrostatic pressure.
- Digital pressure transmitter for gauge, absolute pressure and level measurement.
- Advanced digital pressure transmitter for gauge, absolute and differential pressure, level and flow measurement. Integral square root extractor for venturi flow.

**Features and benefits**
- **Vortex**
  - Compact or remote design (max. 15 m)
  - Single or dual transmitter version
  - Flow, pressure and temperature reading at one single point
  - Accuracy: ± 0.75 % ... 2.5 % (depending on media)
  - Fully-welded stainless steel construction; high corrosion, pressure and temperature resistance
  - Isolation valve to protect pressure sensor during pressure/leak testing in the pipe
  - Communication: HART®
  - Approvals: FM, ATEX, IEC Ex

- **Pressure**
  - Piezoresistive measuring cell with ceramic diaphragm (P200) or SS diaphragm (P210/220)
  - Fixed-range transmitter
  - Measuring range starting at 100 mbar up to 600 bar
  - For aggressive and non-aggressive gases, vapors and liquids
  - High measuring accuracy < 0.25 %
  - Rugged stainless steel enclosure
  - Compact design
  - EPDM gaskets for drinking water
  - Ingress protection up to Fully IP67
  - Available in explosion-protected design according to ATEX

- **Pressure**
  - Piezoresistive measuring cell, oil-filled
  - Measuring range from 10 mbar to 400 bar
  - High measuring accuracy up to 0.075 %
  - Configuration through push buttons and LCD, HART® or PROFIBUS PA
  - Ingress protection up to IP68
  - Front flush mounted membrane and housing made of stainless steel
  - FDA-compliant filling oils
  - Excellent surface quality (Ra value ≤ 0.8 μm for process wetted parts)
  - Communication: 0–20 mA, HART®, PROFIBUS PA or FF
  - Approvals: EHEDG, 3 A

- **Pressure**
  - Piezoresistive measuring cell, oil-filled
  - Measuring range from 0.01 psi to 10153 psi
  - High measuring accuracy up to 0.065%
  - High long-term stability up to 0.125 % per 5 years
  - Separate replacement of measuring cell and electronics without recalibration
  - Configuration through push buttons / LCD
  - Ingress protection up to IP68
  - Extensive diagnostics and simulation functions with PDM
  - Communication: 0–20 mA, HART®
  - Approvals: FM, SIL, CSA, IECEx, ATEX, NSF/ANSI 61 NSFI, ANSI 372

**Typical applications**
- Consumption measurement in compressed air systems and other industrial gases or steam installations.
- Compact and economical pressure measurement in clean water and waste water process.
- Pressure measurement in raw water intake, sludge line, grit wash water, methane gas, chemical storage, industrial utility applications, desalination and irrigation.
- Various pressure, level and flow measurement in water/wastewater plants, chemical storage and other utility installations. Desalination & irrigation installations.

Pneumatic, digital valve positioner with unique low air bleed design.

SITRANS TS temperature sensors for a wide range of temperature applications.

Portfolio of temperature transmitters for head, rail or field mounting, for connection to many different thermocouples, resistance thermometers, as well as mV and resistance sensors.

**Brief description**

- Almost zero air bleed at steady state (HYPERLINK "http://www.usa.siemens.com/cost-of-air" Cost of Air Calculator)
- Controls any style of pneumatic actuator
- Advanced valve diagnostics included, just turn them on
- Pushbuttons and display included, no additional setup equipment required
- Over 300+ mounting kit solutions
- Optional Remote Mount, Wear-Free Position Detection, Integral High Flow (Cv)

**Features and benefits**

- For all pneumatic control valve and on/off valve applications.
- For all temperature applications, e.g. surfaces, bearings, machinery, equipment, in vessels and pipes.
- For all temperature applications.

**Typical applications**

- SITRANS TS5500
  - Modular system of tubular or barstock thermowell, extension, connection head with optional transmitter and display
  - Replaceable measuring insert makes it possible to conduct maintenance work even without shutting down operations.
  - Available in explosion-protected design according to ATEX and IECEx

- SITRANS TH
  - Installation in connection head Form B
  - Galvanic insulation and fault detection
  - EMI-resistant transmission of the signal

- SITRANS TR
  - 2-wire rail-mount

- SITRANS TF
  - Die-cast aluminum or stainless steel housing
  - LCD display
  - Available in explosion-protected design according to ATEX and IECEx
  - 4–20 mA, HART®, PROFIBUS PA, FOUNDATION Fieldbus, WirelessHART®

<tr>
<td>SITRANS WW100 and WW200 weighfeeders provide continuous feed rate control of lime for slaking in water purification processes. With dust-tight enclosure options and high temperature belt these proven weighfeeders ensure uninterrupted control for optimum process quality.</td>
<td>± 0.25 – 0.5% accuracy over a 10 – 100% capacity rate range</td>
</tr>
<tr>
<td>The Milltronics MSI belt scale has more approvals than any other belt scale on the market with general, food, hazardous and trade approvals.</td>
<td>± 0.5% accuracy over a 20 – 100% capacity rate range</td>
</tr>
<tr>
<td>Non-contacting, single setpoint motion sensor alarm unit, used with MSP and XPP motion sensing probes.</td>
<td>4 inch sensing gap allows probe to be located away from moving machinery reduces the risk of damaging the probe</td>
</tr>
<tr>
<td>Heavy-duty stand-alone zero-speed alarm switch</td>
<td>Setpoint adjustment 2 to 3000 PPM (pulses/minute) for used in a wide range of applications</td>
</tr>
</tbody>
</table>

**Features and benefits**:
- ± 0.25 – 0.5% accuracy over a 10 – 100% capacity rate range
- Compact design for easy retrofit or new installations
- Painted mild steel, or stainless steel options
- Dust-tight easy-open enclosure options
- Self-cleaning belt support pans or bars
- Up to 100 tph flow rate capacity
- Complete process control with Milltronics BW500 integrator
- Communication (BW500): 4 – 20 mA, Modbus ASCII, Modbus RTU, Modbus TCP/IP, Ethernet/IP, PROFINET, PROFIBUS DP, DeviceNet
- Approvals: CSA, FM, Atex, IEC Ex, GOST-R Ex

**Typical applications**:
- Lime slaking.
- Solids sludge transport on conveyors.
- Detect stopped or slipping screw conveyors, belt conveyors, rotary vane feeder, or rotating shafts.

### Brief description

- **SITRANS RD100**: Loop-powered remote display. RD200 is a universal remote digital display for Probe LU240, Probe LR, SITRANS P MPS to install at or in areas with easier access.
- **SITRANS RD300**: Dual-line, panel mount, remote digital display for process instrumentation for Probe LU240, Probe LR, SITRANS P MPS to install at or in areas with easier access.
- **SITRANS RD500**: Remote data manager providing remote monitoring through data logging, web access and alarming for instrumentation.

### Features and benefits

- **SITRANS RD100/200**
  - Make measurement data visible and accessible from a remote location.
  - Compatible with all types of field instruments in varying process conditions.
  - Easy to set up and program.
  - SITRANS RD200 includes freely available logging and monitoring software, allowing multiple displays to be monitored from one PC.
  - SITRANS RD200 has optional large display with 35 mm (1.2") high LED.

- **SITRANS RD300**
  - Easy-to-read, dual-line display with eight brightness levels.
  - Flexible outputs with up to eight relays and eight digital I/O for process control alarming.

- **SITRANS RD500**
  - Integrated web and ftp server, email and sms for alarming, and up to 2 GB for data logging of instrumentation.
  - Simple access to data remotely installed instrumentation.
  - Collects and sends sensor data to logistics systems providing up-to-date, timely, and accurate information. Ethernet or Modem (PSTN/GSM/GPRS) carries data to your desktop without the need of additional software.

### Typical applications

- Remote process monitoring.
- Remote process monitoring.
- Remote monitoring of inventory levels, process and environmental applications, provides web access to most types of field instrumentation, including flow, level, pressure, temperature measurement and weighing.

### Service & Support

**Siemens Process Instrumentation** provides a complete line of service and Advantage+ programs to keep your operation running with superior performance.

**SIMATIC PDM Maintenance Station V3.0**, Siemens offers an optimal tool for efficiently monitoring the condition of smart field devices, irrespective of the automation or control systems used. SIMATIC PDM is a universal, non-proprietary tool for the configuration, parameterization, commissioning and monitoring of smart field devices. The maintenance station is based on the SIMATIC DCS PCS 7 maintenance system but is now available as a standalone system. MS can run independently of the both the customers' automation control projects as well as with complete autonomy from the PLC/DCS process control systems being used.

**SITRANS Library** consists of function blocks, block icons and faceplates for a growing number of field instruments out of the families SITRANS and SIPART. Target systems are SIMATIC PCS 7 and SIMATIC PLCs in parallel with SIMATIC WinCC and panels. Automation solutions can be implemented just by using already existing features and diagnostics information available in the instruments.

### Brief description

#### Services
- Start-up
- Calibration
- Troubleshooting
- Training

#### Advantage+
- Advantage+ Support
- Advantage+ Shipping
- Advantage+ Stock
- Advantage+ Extended Warranty

#### Features and benefits
- Same functions and user interface as the SIMATIC PCS 7 Maintenance Station
- Possibility of data collection, analysis and processing in the cloud
- Operation is independent of the technological project and the automation system used
- Compact, flexible and expandable maintenance station
- Supports various communication types and gateways between bus systems, such as Ethernet, PROFINET, PROFIBUS DP/PA and HART
- Parameterization and Maintenance Station detailed diagnostics of the field devices via integrated SIMATIC PDM
- One station can aggregate data of multiple automation projects

#### Devices supported:
- SITRANS F M MAG 6000
- SIPART PS2 with PROFIBUS PA and 4–20mA/HART® interface

Customer advantages are:
- Same look and feel like standards in SIMATIC PCS 7
- No additional training for operators
- Usage of features in field devices without additional cost: customers use what they already have paid for

### Typical applications

- All field applications, start-up and services
- Advantage+ Shipping: standard shipping covers basic freight charges, duties and taxes
- Advantage+ Stock: offers quick delivery for unexpected needs
- Technical Support Hotline
- Mobile App for Siemens Industry Online Support
- Stand-alone maintenance station for diagnostics and condition monitoring of field devices with EDD/DD/DDI technology
- Stand-alone maintenance station for small and medium-sized facilities (up to 500 field devices per maintenance station) in process and production automation
- Subsystem-specific use in large facilities
- Central data access point of plant data for cloud based apps
- Permits simultaneous access for 30 independent PDM web-clients users

- Innovative dosing using the dosing feature of SITRANS F M MAG 6000 at lower cost
- Fast and flexible operation of valves with SIPART PS2 with a much higher degree of transparency

Totally Integrated Automation

Products from the controller level to the field level
With Totally Integrated Automation (TIA), Siemens is the only provider of an end-to-end integrated portfolio of products and systems for the automation of the entire production workflow.

Totally Integrated Automation reduces the complexity of the automation solution and enables what really counts: the practical combination of optimally coordinated individual components – without interface problems.

Totally Integrated Automation integrates not only the production process but all parts of the company – from the field level to the management level. The result: a perfectly coordinated overall concept that enables higher productivity.

Example: SIMATIC PCS 7. The innovative process control system offers numerous options for connecting I/Os as well as for sending and receiving process signals via sensors and actuators.
With Siemens Process Instrumentation you are in complete control of your water and wastewater operations. That’s why it’s so important that your team be fully trained to maintain and handle any situation that may arise. Our comprehensive training classes are led by field-proven and experienced instructors who combine extensive application and instrumentation knowledge with many years of training experience.

Our 3 day, comprehensive, hands on water and wastewater class provides students with the technical knowledge required to specify, apply, install, and maintain process instruments utilized in both drinking water and wastewater applications.

Want to learn even more? Our technology focused courses delve deeper into a wide array of specific topics, including pressure, temperature, level, valve positioners, loop controllers, flow, weighing and industrial communications.

Classes are offered throughout the year at various locations or through our mobile training platform we can bring the class right to you!
