Complete level solutions
A new level of experience in all of your applications.
Transparency. Connectivity. Intelligence.

The eyes and ears of digitalization.

Enormous potential benefits await your operations with Industry 4.0. With unparalleled control and access, you now have complete knowledge of what’s happening in your plant at all times.

But even in the age of digital, you still need accurate, reliable, and rugged process instrumentation. Because if field instruments are unable to supply the right data, even the most sophisticated digitalization initiative won’t help.

Take the MultiRanger/HydroRanger ultrasonic level controller. Connect it to Siemens MindSphere Cloud for Industry and see your operations open up before you. Access to all sensor data and device parameters allows you to compare level readings with external sensors – compare outside temperatures to river levels combined with rain fall gauges to predict flood zones. Intelligent level monitoring brings intelligent operations.

With the knowledge that no single technology can address the needs of all industrial applications, Siemens provides a complete range of level measurement devices. All backed by our global support network, providing experienced sales and technical assistance when and where you need it.

Siemens level measurement

Monitoring water levels in open channels. Tracking the amount of grain in a silo. Measuring oil in a tank. Simply put, level measurement tells you how much material is at a given location.

The right instrument for your application

With the knowledge that no single technology can address the needs of all industrial applications, Siemens provides a complete range of level measurement devices. Ultrasonics. Radar. Guided wave radar. Capacitance. Point level. Gravimetric. Hydrostatic.

Complementing our level technology are Siemens analytics, automation, and drives for industries around the globe:

- Flow
- Weighing
- Pressure
- Temperature
- Positioning
- Power supplies
- Process protection
- Process controllers
- Remote displays
- Process recorders
- Gas analytics
- Gear reducers
- Motors
- Control systems
- Industrial communication
- PLCs
- HMIs
- Drives
- Motion control
Radar for solids

SITRANS LR560 is the easiest to use solids radar transmitter on the market. With a high frequency of 78 GHz, 4 degree narrow beam, and short wavelength, it performs reliably on solids material from practically any installation location.

For extremely low dielectric, low density powders, the 25 GHz SITRANS LR460 is the preferred solution. Featuring a horn antenna with an 8 degree beam, the 4-wire FMCW SITRANS LR460 has proven itself in thousands of applications.

Siemens solids radar transmitters easily tackle dusty environments and are not affected by temperature changes.
**SITRANS LR560**

First choice
- Challenging solids applications
- Intrinsically safe

**Order No.**
- 7ML5440
- 7ML5426
- 7ML5427

**2-wire, 78 GHz FMCW radar level transmitter**
- For continuous monitoring of solids or liquids.

**Range**
- 40 m (131 ft)
- 100 m (328 ft)

**Process temperature**
- -40 to 100 °C (-40 to 212 °F)
- -40 to 200 °C (-40 to 392 °F)

**Key features**
- Graphical Quick Start Wizard for easy and fast setup
- Push buttons or optional Intrinsically Safe infrared handheld programmer
- Air purge connection included
- Aimer flange for optimizing readings in the silo cone area

**Communications or outputs**
- HART, PROFIBUS PA, or FOUNDATION Fieldbus
- Enhanced EDD for SIMATIC PDM, Emerson AMS Device Manager, SITRANS DTM (for PACTware), 375/475 handheld, for configuration and diagnostics

---

**SITRANS LR460**

- 4-wire, 25 GHz FMCW radar level transmitter
- For continuous monitoring of solids.
- Ideal for materials with extremely low dielectric properties.

**Range**
- 40 m (131 ft)
- 100 m (328 ft)

**Process temperature**
- -40 to 200 °C (-40 to 392 °F)

**Key features**
- Intrinsically Safe infrared handheld programmer
- Extremely high signal yields high performance (high signal-to-noise ratio)
- Quick Start Wizard for setup
- PTFE antenna cover
- Air purge connection

**Communications or outputs**
- HART or PROFIBUS PA
- Enhanced EDD for SIMATIC PDM for configuration and diagnostics

---

**SITRANS LR260**

- 2-wire, 25 GHz pulse radar level transmitter
- For continuous monitoring of solids and liquids.
- Ideal for applications requiring quick update rates.

**Range**
- 30 m (98 ft)

**Process temperature**
- -40 to 200 °C (-40 to 392 °F)

**Key features**
- Reliable and accurate – high signal and low noise yields high performance
- Graphical HMI makes operation simple with plug-and-play setup using the intuitive Quick Start Wizard
- Optional dust cover and air purge available

**Communications or outputs**
- HART or PROFIBUS PA
- Enhanced EDD for SIMATIC PDM and SITRANS DTM (for PACTware) for configuration and diagnostics
SITRANS LR250 is your first choice for liquid level measurement in storage and process vessels to 20 meters (66 ft). With its range of antennas, this transmitter can handle whatever you need it to. Its new encapsulated antenna and class-leading range of process connections mean that hygienic applications are no problem for this instrument.

For process vessels which may include turbulence, buildup, or foam, choose SITRANS LR200. Its low frequency better suits this environment and functions reliably in applications up to 20 meters (66 ft).

And for basic continuous monitoring, SITRANS Probe LR offers a small process connection for easy installation. It’s low frequency operation means high immunity against condensation or deposits.

Measuring interface or level? We can do that. Quick and easy setup with local four-button programming, and menu-driven Quick Start Wizard and remote display with fast USB interface gets you operational in minutes, saving you time and money.

Advanced echo processing gives you unrestricted measurement down the length of the entire probe, so you’ll always have accurate readings even in small containers.
## SITRANS LG240
- Order No.: 7ML5880
- Range: Cable version: 4 mm (0.16”), max. length 32 m (105 ft), Rod version: 8 mm (0.31”), max. length 4 m (13 ft)
- Key features: High-grade stainless steel rod for hygienic, food and beverage, and pharmaceutical, Suitable for foam, aggressive vapors, or material buildup, Ideal for small vessels, Stainless steel housing for high-pressure/temperature cleaning, Autoclave version available, PFA coated sensor, SIL 2
- Accuracy: ±2 mm (0.08”)
- Communications or outputs: 4 to 20 mA/HART, PROFIBUS, Modbus, and Foundation Fieldbus, Support for SIMATIC PDM, Emerson AMS, handheld, for configuration and diagnostics
- SIL 2

## SITRANS LG250
- Order No.: 7ML5881
- Range: Exchangeable cable version: 2 mm (0.08”), 4 mm (0.16”) max. length 75 m (246 ft), Exchangeable rod version: 8 mm (0.31”) max. length 6 m (19.7 ft), Coaxial version: 21.3 mm (0.84”), 42 mm (1.62”) max. length 6 m (19.7 ft)
- Key features: Reliable and accurate in all liquids – raw materials, storage, and processing, Suitable for foam, buildup, and steam, Easy switch from interface to level measurement, Second barrier for aggressive materials, including ammonia, SIL 2
- Accuracy: ±2 mm (0.08”)

## SITRANS LG260
- Order No.: 7ML5882
- Range: Exchangeable cable version: 4 mm (0.16”), 6 mm (0.24”), 11 mm (0.43”) max. length 60 m (196.8 ft), Exchangeable rod version: 16 mm (0.63”) max. length 6 m (19.7 ft)
- Key features: Reliable and accurate measurement in powders, granules, and extreme dust such as plastic applications, Continuous probe condition monitoring ensures operational safety and application reliability, Probe analysis allows for measurement under loss of echo situations due to low dk
- Accuracy: ±2 mm (0.08”)

## SITRANS LG270
- Order No.: 7ML5883
- Range: Exchangeable cable version: 2 mm (0.08”), 4 mm (0.16”) max. length 60 m (196.8 ft), Exchangeable rod version: 16 mm (0.63”) max. length 6 m (19.7 ft), Coaxial version: 42 mm (1.62”) max. length 6 m (19.7 ft)
- Key features: Extreme conditions with high or low pressures or temperatures, Strong construction with dual seal to ensure its integrity in tough applications including ammonia, Real-time measurements for applications in steam boilers, Safety rated for 72 hours of unattended operation
- Key features: SIL 2

## Specifications
- **Hygienic and corrosives**
- **General liquids**
- **Bulk solids**
- **Extreme conditions**
Ultrasonic controllers and transmitters

For close to thirty years, the MultiRanger 200 and HydroRanger 200 have been the industry standard for level measurement in a world of industries. Now we’ve made the best even better. These enhanced controllers give you unparalleled ease of use, setup in under a minute, customer-driven features, and PROFIBUS DPV1 PROFINET, TCP/IP, Ethernet.

As well, with world-leading accuracy of ±1 mm (0.04”), SITRANS LUT400 gives you confidence in your measurements across a wide range of industries.

SITRANS Probe LU uses Auto False-Echo Suppression for fixed obstruction avoidance, providing you with unmatched reliability.

The SITRANS LU150 is a cost-effective, short-range, non-contacting ultrasonic level measurement transmitter that combines both the sensor and electronics into a one-piece, sealed unit.

**Key features**

- **SITRANS LUT400** are compact, single point, long range ultrasonic controllers for continuous level or volume measurement of liquids, slurries, and solids, and high accuracy monitoring of open channel flow.
- **MultiRanger/HydroRanger** are versatile short- to medium-range ultrasonic single and multi-vessel level monitor/controllers for virtually any application in a wide range of industries.
- **SITRANS Probe LU** is a 2-wire loop-powered level measurement transmitter for measuring storage vessels, filter beds, and open channel flow in the water and wastewater, food, and chemical industries.
- **SITRANS LU150** is a short-range integrated ultrasonic level transmitter – ideal for liquids and slurries in your open or closed vessels.

- **Digital receiver for high performance and reliability in noisy applications**
- **Intuitive ease of use**
- **Advanced pump, alarm, and flow control features with three relays**
- **Integrated datalogger**
- **Real time clock with daylight saving time and energy-saving algorithms**
- **Range of models for simple level measurement or pump control to more complex for differential level, open channel measurement, advanced pump control, alarming, and gate control**
- **Auto False-Echo Suppression to avoid false echoes from fixed obstructions**
- **Intuitive ease of use**
- **Six relays**
- **Superior functionality and plug-and-play performance**
- **Programming via PC software or infrared handheld programmer**
- **IP66 rated**
- **Level, volume, and flow measurement**
- **-40 to 85 °C (-40 to 185 °F)**
- **PVDF transducer for chemical compatibility**

**Communications or outputs**

- **HART: EDDs for SIMATIC PDM, Emerson AMS Device Manager, and Field Communicator 375, plus SITRANS DTM for FDIs**
- **RS-485 with Modbus RTU or ASCII**
- **Compatible with SIMATIC PDM via Modbus RTU, PROFINET, or PROFIBUS**
- **SmartLinx cards for PROFINET, Modbus TCP/IP, Ethernet/IP, PROFIBUS DP, DeviceNet**
- **HART or PROFIBUS PA**
- **EDD for SIMATIC PDM for remote configuration and diagnostics**
- **FDT such as PACTware or Fieldcare via SITRANS DTM (HART version only)**
- **4 to 20 mA output**
Siemens Echomax ultrasonic level transducers provide trouble-free, reliable performance. Our non-contacting transducers are impervious to dust, moisture, vibrations, flooding, and high temperatures. With the ability to detect submergence – when paired with a submergence shield – and an active face to reduce material buildup, these transducers are a perfect fit for a range of industrial applications. Siemens transducers are easy to install and require little to no maintenance.

Echomax transducers feature Sonic Intelligence (when paired with a Siemens controller), our field-proven echo processing algorithms which guarantee the most reliable performance possible. And how about our unmatched beam angle – stronger pulse and sensitivity in a compact beam make our ultrasonic transducers the most powerful in the industry.

*FM Class 1 Div 1 approved.
Hydrostatic level measurement with Siemens gauge, absolute, and differential pressure transmitters is a low cost option for direct mounting or mounting with remote seals on tanks and vessels. These instruments can handle extreme chemical and mechanical loads as well as electromagnetic interference. They are widely applied in chemical and petrochemical industries.

Inverse frequency shift capacitance with Active-shield technology for reliable measurements.

**Capacitance**

Tried and tested for a wide range of applications, Siemens inverse frequency shift capacitance continuous level transmitters are suitable for liquids, solids, and interface applications. Siemens capacitance instruments use active-shield technology to ensure true and accurate level readings are recorded from the material surface.

SITRANS LC300 is ideal for standard and industrial applications in the chemical, hydrocarbon processing, and food and beverage industries.
SITRANS LC300

Low-cost basic applications

Order No. | 7ML567x
---|---
Inverse frequency shift capacitance level transmitter for liquids and solids applications; ideal for standard industrial applications in chemical, hydrocarbon processing, food and beverage.

Range
- Rod: max. length 5.5 m (18 ft)
- Cable: max. length 25 m (82 ft)

Process temperature
-40 to 200 °C (-40 to 392 °F)

Process pressure
Up to 35 bar g (511 psi g)

Key features
- Active-Shield technology
- Push-button calibration
- Integrated local display
- Inverse frequency approach provides high resolution

Communications or outputs
4 to 20 mA
Level by weight

With SIWAREX electronics and load cells, not only are you choosing the highest quality in construction, long-lasting performance, and easy integration into your weighing systems, you are also opening the doors to Siemens comprehensive spectrum of instrumentation.

Automate all of your scales with SIWAREX weighing modules. Part of Siemens Totally Integrated Automation (TIA), SIWAREX modules can be integrated into SIMATIC and expanded as required to meet your individual requirements.

Load cells for level weighing

SIWAREX load cells have high precision and repeatability of weighing and batching processes. They are designed for a range of applications, especially when accuracy is a must. With Siemens, you can source both your load cells and electronics. Choose from our extensive, performance-graded line of weighing systems – with everything you need for the whole range of tasks in your industry.

SIWAREX load cells are ideal in almost any industrial sector – food-processing, steel-making, chemical and pharmaceutical, to name a few. With the diverse construction types and comprehensive, graded load classes ranging from 300 grams to 500 tons (6.6 pounds to 551 short tons), you are sure to find the right load cell for your application.

Vibratory and paddle switches

With options as simple or sophisticated as you need them to be, Siemens point level devices are your answer.

Whether you’re looking for backup high- or low-level detection, interface, or dry run protection – these switches will reduce your maintenance, downtime, and equipment replacement costs.

Remote testing? Not a problem. A range of Siemens point level instruments now feature convenient remote testing via single or two-channel remote test signal conditioners or your control system.

Product buildup? In addition to Siemens capacitance technology’s immunity to buildup, rotating point level devices specialize in low bulk density applications, ensuring accurate readings even in dusty, turbulent, and vaporous environments.

Need functional safety in your application? Siemens offers the world’s first rotary paddle switch with SIL options in addition to a series of SIL instruments in all our point level lines.

Whatever your requirement, Siemens has a switch solution.

RF Capacitance and ultrasonic switches

Our level switches offer superior performance while reducing maintenance, downtime, and equipment replacement cost. Their robust design lasts in harsh and abrasive environments, guaranteeing a long service life and low cost of ownership. They are easy to set up and connect to any alarm or control system.

Our unique inverse frequency shift approach to capacitance technology ensures accurate, reliable, and repeatable measurement, even in dusty, turbulent, and vaporous environments or in situations with product buildup. Because even a small level change creates a large and detectable change in frequency, Siemens Pointek CLS series provides excellent resolution while consistently outperforming conventional devices.

Remote monitoring and displays

Ideal for remote monitoring applications including inventory levels, regulatory monitoring, remote maintenance alarming, or process and environmental monitoring, SITRANS RD500 remote data manager helps you stay connected and informed. SITRANS RD500 provides remote monitoring through datalogging, web access, and alarming.

SITRANS RD100, SITRANS RD200, and SITRANS RD300 remote displays bring you the flexibility of seeing instrumentation readings in a convenient location for your operators. There are times when information in the control room or on the instrument is not enough. Siemens’ selection of displays gives you an inexpensive view into your processes.

Sales and support

Custom engineering
Siemens provides custom-engineered products to solve your special application needs. From material compatibility challenges to unique size requirements, Siemens custom engineering team can help.

Service around the world
Plants must function reliably at all times. Efficient and effective process instrumentation and analytics are an indispensable requirement to this end. You also need to be certain of fast and competent service from your supplier. Siemens is a global company that reacts locally. Whether you require consulting, quick delivery, or installation of new devices, the Siemens network of specialists is available to you around the world, wherever your location.

Service around the clock
Our online support system offers rapid, comprehensive assistance regardless of time or location. From product support to service information, Siemens Industry online support is your first choice – around the clock, 365 days a year.
siemens.com/automation/service&support

PI training
Maximize your skills with factory-certified training
Siemens provides a full schedule of Process Instrumentation training opportunities for Siemens employees, channel partners, and customers. The PI Introductory Training courses are designed for new sales and service employees to learn the product lines, the technologies, and the applications. These courses are also prerequisites for the advanced technology courses which provide in-depth application training.

Designed for hands-on learning, all courses are led by field-tested instructors who combine extensive application and instrumentation knowledge with seasoned training experience. Our PI Training Center is specifically designed to optimize your classroom time. It is fully equipped with application simulation stations, a full range of PI instruments, and complete industrial communication networks.

For current information and schedules, visit our website at:
siemens.com/pi-training
Totally integrated automation

Products from the controller level to the field level

With Totally Integrated Automation (TIA), Siemens is the only provider of an end-to-end integrated portfolio of products and systems for the automation of the entire production workflow. From the goods receiving area to the finished goods warehouse.

Totally Integrated Automation reduces the complexity of the automation solution and enables what really counts: the practical combination of optimally coordinated individual components without interface problems.

Totally Integrated Automation integrates not only the production process but all parts of the company from the field level to the management level. The result: a perfectly coordinated overall concept that enables higher productivity.

Communication-flexibility

Siemens TIA approach offers ease of connection to a DCS system such as SIMATIC PCS 7 using industrial standards. Siemens provides communication flexibility, supporting:

- SIMATIC PDM
- PROFIBUS
- HART
- FOUNDATION Fieldbus
- Model 375/475 HART field communicator and Emerson AMS
- SmartLinx (cards are available for PROFIBUS DP, Modbus RTU, and DeviceNet)
- FDT Software via SITRANS DTM
