PI Advantage
Plus program

Siemens PI Advantage+: Giving our customers a competitive advantage.

Siemens is constantly looking for innovative ways to make our customers more competitive by reducing their costs and providing solutions. Advantage+ takes this approach to the next level and illustrates how Siemens can be more than a vendor – we can be your Instrumentation Partner.

What is Advantage+?

Advantage+ is a program designed to help take the unexpected out of daily business with Advantage+ Shipping, Stock and Support.

usa.siemens.com/pi

Advantage+ Shipping:

Includes three levels of service: Advantage+ Standard, Express and Priority Shipping.

Advantage+ Standard Shipping:

With Advantage+ Standard, Siemens Process Instrumentation will cover basic freight charges, duties and taxes. This program demonstrates how Siemens strives to give our customers an advantage with:

- This benefit will be extended to all Siemens Process Instrumentation customers as the standard.
- Reduced budget for inbound freight charges: shipping and handling will be paid by Siemens Process Instrumentation.
- Simplified purchasing process: no need to estimate and plan for additional shipping and handling fees.

Advantage+ Express Shipping:

With Advantage+ Express, your order will ship the quickest way possible from our dock to yours. As with Advantage+ Standard, Shipping taxes and duties are included.

Advantage+ Priority Shipping:

Advantage+ Priority includes priority order handling, processing and scheduling, which means you get to the front of the line when it matters most. Advantage+ Priority offers the fastest reliable delivery. We will not promise the impossible, but we will do everything in our power to exceed expectations.

Advantage+ Stock:

No one can afford downtime, whether it's from unforeseen damage or an unexpected mechanical failure – which is why Siemens developed Advantage+ Stock. When immediate delivery is required to maintain operations, rely on Siemens Advantage+ Stock. Siemens Process Instrumentation maintains inventory of instruments that measure flow, level, pressure, temperature and valve positioning.

Advantage+ Support:

Technical issues are not limited to a 9-5 schedule, and neither are we. You need help when things go wrong, no matter what time of day or night – and that's why Siemens offers 24/7 technical support. Our dedicated team of service engineers, technicians and professionals are on-call, on-site and on-line 24/7 delivering a comprehensive portfolio of services. With Advantage+ Support, requests are processed in the order they are received with an initial response time of two hours.

Technical Support Hotline (24/7):

Comprehensive support from a technical expert is available:
 Online via Support Request: <http://support.industry.siemens.com>
 Mobile via Siemens Industry Support App
 Telephone: 1-800-333-7421
 Field Service and Repair: 1-800-365-8766 (toll-free inside USA)
