Universal Coil Mfg. LLC plans to show all the types of **a-c and d-c coils** it manufactures as well as the materials the company sells. "The convention is a great way to meet the people you talk to daily and meet new connections as well," Universal Coil observes. "We will be showing off our new facility, which has doubled our capability with plenty of room to grow."

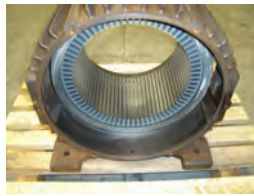

Universal Coil

Vulcan Seals, Inc., which offers "a global distribution network and total commitment to excellence in service, quality, and value," will feature the **sealing products** it manufactures: mechanical seals, FEP/PFA encapsulated O-rings, and mechanical packing.

A selection of Vulcan Seals' products

Laser Laminations, Inc., in business since 2000, will be featuring the **laser-cut laminations, press plates, vent assemblies and other core parts** the company manufactures for service centers. The company also stacks and assembles stator cores, pole pieces, and armature cores.

Laser Laminations

Siemens is offering its complete set of **motor products and services**, including spare parts, product training, application consulting, product repair, field maintenance, and retrofit and upgrade support. The company will also show two new products. The first is the Siemens LP100 vertical solid-shaft motor, which Siemens says

Siemens motor

exceeds the industry's minimum efficiency requirements without sacrificing performance. The second is a medium-voltage 449 Frame motor. Siemens is also posing a challenge. The question comes from the May 2017 *Electrical Apparatus* article by Charlie Barks titled "Meet me in Tampa." The question is: "Tampa's *what* is now the seventh largest in the nation?" Those with the correct answer will be entered into a prize drawing that will be held on Monday, June 26, at 2:00 p.m.

Iris Power, a provider of **condition-based monitoring products** for generators, motors, dry-type transformers, and air-insulated switchgear, aims to provide "the information necessary to assess the risk of failure on critical machines and provide data needed to plan maintenance effectively." The company will be highlighting its sensors, monitors, diagnostic software, and services covering online monitoring technologies.

Precision Electric Motor Sales, which represents Marathon, Fasco, US Motors, Century, and Rotom, will be featuring the **Site Drainer Pump** with a physical demonstration that shows the pump's ability to drain debris-filled water without clogging. Precision Electric Motor Sales offers one-day delivery to most of the U.S., according to the company.

Precision Electric pump

Coil Partners, whose operations were described in a feature-length article in the October 2016 *Electrical Apparatus*, will be displaying its many types of **high-voltage and medium-voltage coils**, which include d-c coils, a-c coils, diamond coils, pole coils, Roebel bars, and hairpin coils.

Coil Partners' coil manufacturing

GW Electric (Shanghai) Co. Ltd. is a motor manufacturer established in 1952 and formerly known as SMM, JLM, and Shanghai Regal-Beloit & Jinling Co. Ltd. (a joint-venture with Regal-Beloit since 2002). In 2014 the company became part of the GW Industrial Group Co. Ltd. The company will be showcasing its **d-c motors and fractional-horsepower a-c motors**, including single-phase and three-phase motors designed to NEMA and IEC standards. The company provides after-sales and technical consulting services for its customers and owns a UL- and CSA-approved laboratory with certification facilities for testing.

Double-Flanged Spring-Set Motor Brakes

You Keep the Motors Running... We'll Help Them Stop.

Ideal for motors used in high-tech, encoder-based control systems. EMTorq's US Service Center stocks the benchmark in brake design, interchangeable with virtually EVERY metric- and inch-dimensioned brake in the field.

22 Models Stocked and Available:

- 11 NEMA models: NEMA 56 C through NEMA 254 TC frame
- 11 IEC/Metric Models: IEC/Metric 56 through 180 frame
